

1. Categorizing the therapists based on services/name (having a search bar on meet our team page) so people can search for people by name or specialization.
Categorize the therapists based on services (HAIR, NAILS, MASSAGE and MAKE-UP). Also, have the therapists appear in alphabetical order on the page.
2. Changing the design around therapists photos removing the green colour and the style, make it a bit more minimalistic with some dark grey and keep the pink. An example is shown at the end of the document.
3. Changing the green and pink blocks design around services.
4. Changing the design of the gift cards page makes it a bit more friendly.
5. Upon pressing REGISTER remove the need to verify the email. Give them the option to login straight away after completing all the forms. They have to insert the password 2 times upon registration to make sure the password is correct.
6. When a guest user is browsing the website and they add an order to the basket at the moment of check out they either have to login or register, give them the 2 options and then directly to payment detail without the need to verify the email. " I will attached picture below
7. When clients register, DO NOT give the option of choosing Country (we only operate in UNITED KINGDOM) so have the UK as the only allowed option. Also we need to collect the phone number upon registration as we need it in our database.
8. When customers insert the post code can we have something automatic that lists the street name, house number and flat. Before check out they need to insert the full address, because now the address that the therapist gets are just the billing address and the postal code area but if they order from another location the therapist will get the wrong address.
9. As a client, after BOOKING->CONTINUE BOOKING->FINAL PAGE CHECKOUT (merging the final 2 pages into one, keeping the total summary with the cost of every service showing individually and then the total). So we can make the whole process shorter.
10. Adding TRUST PILOT verified with the latest 4.5* to 5* reviews only instead of having the testimonial (on home page) we will have all the latest reviews that are updated in order as we receive them.

11. When booking directly with the stylist we need to make the add on a bit more visible and remove all the treatments from below on that page.

Developer Note: The treatments listed are the specialization of the stylist. Do we need to remove these treatments? Could you please clarify more with the example page. **Yes because the treatment aren't linked to the Stylist**

BUGS

12. On the single stylist page remove all the services from below as they aren't linked to the stylist but they redirect to the general booking. So it is unnecessary. **Bug**

Note : Please get a screenshot of the issue where it is listing.
Are you sure it's on stylistlist single page?

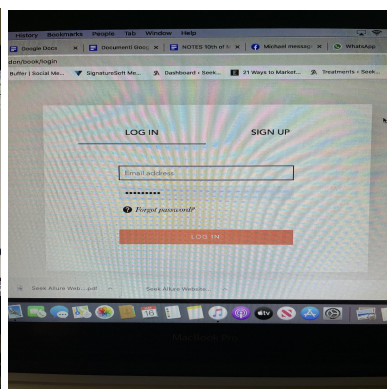

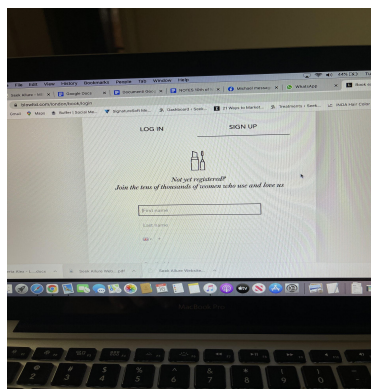

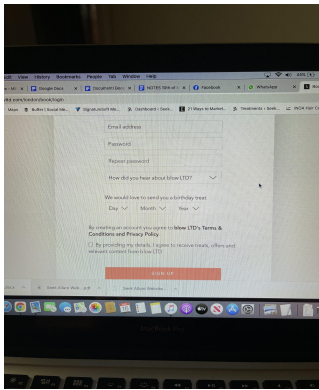

13. Also we need to check the chat the picture never really worked sometimes they go through sometimes they don't. **Bug**
14. Since we migrate all the codes some of the emails have changed the format we need to check them. **Bug**

When booking directly with a single stylist if a customer chooses 2 treatments together the services are booking the time out of the therapist calendar so then the therapist isn't able to accept the booking. **Bug**

15. Hotmail / outlook not receiving mails supposedly (test thoroughly)

SCREENSHOTS :

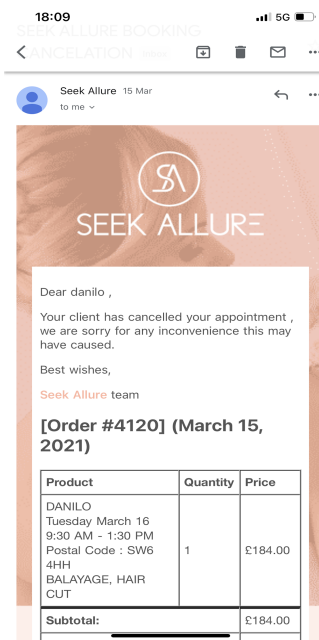

Example of login or registration for guest users upon checkout.

Wrong email format

This is the correct format how they used to be:

Example for nr. 2
